Re _____

To the First Deputy Head
of Administration of Tuapse region
of Krasnodar Territory,
Chairman of the Interdepartmental
Committee for the allocation of
productive forces in the region

A.A. Sudyin

Administration of the region has reviewed the proposals made by YACONTO LLC, described in the Declaration (Petition) of an intent to build «Commercial Black Sea Port YACONTO» in the Tuapse region, in the area of «Vesna» and «Yuzhni» railway stations. Implementation of the objectives proposed by YACONTO LLC will lead to termination of operation of health resorts «Vesna», «Gizel-Dere» and «Yuzhni» (as health resorts), located in the area of future construction of the port. The population inhabiting the strand has a traditional, hospitality-centered lifestyle. Establishment of the port will lead to development of an industrial area and will change the lifestyle of the population.

At the same time, the construction of the port would significantly expand the infrastructure of the district and of Tuapse region as a whole and soothe social tensions originating from the seasonal character of employment.

Considering the above, the administration of the district fully supports the creation of «Commercial Black Sea Port YACONTO», expecting the investors to provide assistance in socio-economic development of the Shepsie rural district and guarantee employment for the population of the district.

Acting Head of the District

V.M. Podufalyi
