

27.02.2012 № 120227-A01

Regarding violation of my Constitutional rights of a Citizen of Russian Federation and a Proprietor of YACONTO LLC (Moscow)

In addition to the Letter of YACONTO LLC out. № 111108-A01 from 08.11.2011 based on the RF Presidential Decree № 352 from 28.03.2011

**To the President
of Russian Federation**

D.A. MEDVEDEV

personally

Dear Dmitry Anatolyevich !

Following your 4 Orders: from 29.06.2010 № Pr-1883, from 21.08.2010 № Pr-2448, from 19.05.2011 № Pr-1413 and from 08.07.2011 № Pr-1948 an investigation of the bankruptcy and liquidation of Atommash OJSC (Volgogradsk, Rostov region), where the State controlled 30% shares, is being conducted.

YACONTO LLC has submitted to the General Prosecutor of Russia Y.Y. Chaika the following: a Complaint (out. № 110201-A01 from 01.02.2011), Addendum № 1 (out. № 110303-A01 from 03.03.2011) and Addendum № 2 (out. № 110321-A01 from 21.03.2011) to the said Complaint; a Statement (out. № 110418-A01 from 18.04.2011), Addendum № 1 (out. № 110607-A01 from 07.06.2011), Addendum № 2 (out. № 110808-A01 from 08.08.2011) and Addendum № 3 (out. № 110915-A01 from 15.09.2011) to the said Statement. These appeals and documents attached thereto contain irrefutable evidence and proof of anti-state activities of specific officials on federal and regional level involved in the case of an intentional bankruptcy and liquidation of Atommash OJSC, the flagship of Russian nuclear engineering.

In reality, the inspection has turned into a sluggish profanity that involved officials from law enforcement, supervisory and control authorities of the Federal Center, acting in the interests of the former leadership of the Rostov region. Puppeters of this orgy are found even in the Presidential Executive Office of Russia and the Russian Government. Detailed information is contained in documents attached to previous letters from YACONTO LLC to you.

It is totally incomprehensible and contemptible to see the odious ex-Governor of the Rostov region V.F. Chub, who directly influenced the bankruptcy of Atommash OJSC and hundreds of other major enterprises of the Rostov region, occupying a position that gives him immunity from legal prosecution for nineteen

years of unlawful activity in the Rostov region. With the assistance of the patrons from the Presidential Executive Office of Russia and the Staff of the Government of Russia, after the elections to the Russian State Duma, with another attempt - this time a successful one - **(on Saturday 24.12.2011 right before the New Year !)** Chub was **“dragged” into the membership in the Federation Council of Russia** as a representative of the Murmansk region, as if there were no more worthy candidates than the criminal “individual” from the Rostov region. Anti-state activities performed by Chub were explicitly covered and supported by documented evidence found in the earlier communications from YACONTO LLC to federal executive and legislative branches, as well as to the intelligence, law enforcement and supervisory authorities of Russia. Chub and his corrupt patrons deserved a dock with capital punishment and full confiscation of property - punishments that are successfully used in China and not abolished in the U.S.

The former Governor of the Rostov region V.F. Chub bears critically important information on the privatization of enterprises and redistribution of property through the process of massive intentional bankruptcy schemes, developed exclusively for Russia’s ruling elite at federal and regional levels. For this they used their business partners who they engaged back in the 1990s. In order to avoid criminal responsibility for robbery and bankruptcy of enterprises of Rostov region, seasoned Mr. Chub took advantage of young Russian “reformers” who did not have a mechanism for administrative and economic management of the regions. Therefore, the “reformers” only received “crumbs” from looting and destruction of industry, agriculture and science in the Russian regions, in contrast to “bison” like the Governor of Rostov region Chub.

Those who continue to cover up V.F. Chub understand what is going to happen if competent authorities obtain truthful testimony from him through a **“lie detector”** - this testimony would be sufficient to initiate a thorough investigation of anti-state activities of the “individual” and his accomplices at federal and regional levels. Today’s powerful accomplices and those who were in power, and next to it in 1990s, are links in one chain, and this is why the “Rostov celestial” remains in power. Moreover, he has sufficient funds to pay from for the “prolongation of indulgences”.

In 1996 I had a meeting with the Minister of Atomic Energy of Russia V.N. Mikhailov and his First Deputy L.D. Ryabev regarding formulation of common policies and joint action plan aimed at preservation and development of Atommash OJSC as a single production facility. To achieve this goal, I offered to consolidate the shares of Atommash OJSC owned by the State and YACONTO companies. But agreements from V.N. Mikhailov and L.D. Ryabev were not enough because the State-owned stake in Atommash OJSC was at the disposal of the State Property Committee of Russia. Members of an organized group of interested officials (OGIO) and an organized crime group (OCG) from the Government of Russia and the State Property Committee of Russia strictly and groundlessly

refused to pass the control over 30% shares of Atom mash OJSC to the Ministry of Atomic Energy.

Explanatory Note of YACONTO regarding necessary measures for overcoming the industrial and economic crisis on Atom mash OJSC provided the basis for the Letter by L.D. Ryabev (out. № 03-2739 of 12.09.1996) addressed to: General Director of the Federal Office for Insolvency (Bankruptcy) Proceedings of the Russian State Property Committee P.P. Mostovoy, the First Deputy Minister of Finance of Russia A.P. Vasilyev, First Deputy Minister of Economy of Russia J.M. Urinson, Head of Administration of the Rostov region V.F. Chub and the Chairman of the Federation of Trade Unions of Rostov Region V.P. Voronin.

However, Governor V.F. Chub utilized the suggestions of Ministry of Atomic Energy of Russia in the interests of OGIO and OCG, who took over management of Atom mash OJSC in the autumn of 1995 and engaged in markdown and sale of its property for a pittance. V.F. Chub addressed P.P. Mostovoy (**out. № 1/6049 from 19.09.1996**) with a request to assist him in the implementation of a program for stabilizing the financial and economic situation of Atom mash OJSC. This program, according to the letter, has been allegedly “developed” according to “Orders” of the Government of Russia by the Federal Office for Insolvency (Bankruptcy) Proceedings of Rostov region “in co-authorship” with the bankruptcy referee A.Y. Stepanov and the management of Atom mash OJSC. In particular, in the letter it is asked to allow, through reducing the capital surplus, “writing off” fixed assets and allegedly “under construction” sites of Atom mash OJSC (according to the list) worth **878 billion rubles** which led to devaluation of its assets, even though the value of those objects has already been drastically discounted. There are many similar examples of anti-state activities of OGIO and OCG members. While the value of company’s assets has dropped significantly, the proportion of accounts payable has increased dramatically, growing exponentially “by leaps and bounds”. Multiple markdowns and sales of the unique industrial complex of Atom mash OJSC for a pittance also contributed to the intended collapse of capitalization and asset value of the industrial giant. However, law enforcement and supervisory authorities do not want to see this as a crime which dealt huge material damage to the State, commensurate with the erosion of Russia’s economic security. In all countries, except Russia, the perpetrators of such “acts” are subject to capital punishment and confiscation of property both from the perpetrators and from those of their relatives and front men which de jure possess property acquired by criminals.

Who and by what Law granted the Governor of the Rostov region V.F. Chub the rights to "approach the federal government and management with a proposal to markdown and write-off assets" of Atom mash OJSC ? Who and by what Law granted the General Director of the Federal Department for Insolvency (Bankruptcy) Proceedings P.P. Mostovoy the rights to "approve markdowns and write-offs of the property" of Atom mash OJSC, an

enterprise which was owned by thousands of equally legitimate shareholders, and where the state itself owned 30% shares ?

Concern YACONTO CJSC (Russia, Moscow) owned 28.5% shares of Atom mash OJSC, therefore the premeditated bankruptcy of the Russian nuclear engineering flagship resulted in illegal property loss for both the state and the Concern YACONTO CJSC.

Being the founder and the owner of YACONTO LLC (Russia, Moscow), which is the full and sole successor of Firm YACONTO LLP, Trade House YACONTO SE and Concern YACONTO CJSC, I am fully aware of what was really happening in Atom mash OJSC.

The absurdity of the situation surrounding the verification of the bankruptcy of Atom mash OJSC lies in the fact that every single appeal of YACONTO LLC is being redirected to law enforcement authorities of the Rostov region, which cover anti-state activities of the participants of OGIO and OCG mentioned in the documents of YACONTO LLC for the state prosecution. Verification of the bankruptcy of Atom mash OJSC turned into a vicious circle.

In particular, an analysis of the Resolution of 24.12.2011 “not to institute criminal proceedings”, issued by the Senior operative of 1st division of ES PC and TEC OSB of ES PC № 1 GD MOI of Russia in Rostov region, police Captain E.I. Kobozev (which arrived to my postbox **without his signature**), and approved by the Chief of the police for operative work of GD MOI of Russia in Rostov region, police Colonel I.A. Boychenko, confirms once again that its content is, in essence, no different from all previously issued Resolutions of Volgodonsk IA, Rostov region. As for the verification of the facts of illegal activity of certain individuals involved in the bankruptcy case of Atom mash OJSC, mentioned in numerous appeals of YACONTO LLC to the General Prosecutor’s Office of Russia, no investigative activities for the collection of essential data for the criminal case have been carried out by the Rostov region police whatsoever. This proves a prejudice in conducting the formal verification of the deliberate bankruptcy of Atom mash OJSC. The ruling elite acting in the interests of its monopoly business partners is serious about controlling the bankruptcy case of Atom mash OJSC and is making every effort to avoid criminal proceedings and prosecution of officials and their associates who took part in this major anti-state offense.

It’s not a coincidence that not a single Resolution of the Volgodonsk police and GD MOI of Russia in Rostov region contains a slightest reference to the Letter of the Governor of Rostov region V.F. Chub (**out. № 1/6049 from 19.09.1996**) to his accomplice - General Director of the Federal Office for Insolvency (Bankruptcy) Proceedings P.P. Mostovoy.

Another equally telling example of sheer lawlessness and violation of Constitutional rights in Russian Federation is the fact that law enforcement and supervisory authorities are ignoring the demands of the Russian

YACONTO enterprises to the Bankruptcy Trustee of Atom mash OJSC S.V. Chesskiy (out. № 19-7-PKYA from 19.07.1999) to return Design documentation (DD) for the Biomass Energy Unit (BEU) and the woodcarving machine model «YACONTO DK-1». The scientific and technical products, being the intellectual property of the Firm YACONTO SE (LLP), was transferred to the State Enterprise PA “Atom mash” on the basis of the Treaties № 13-7-DYA from 13.07.1992 and № 17-02-DYA from 17.02.1993 for adaptation and mass production of items.

Back in 1991, when the whole USSR experienced a severe economic crisis, particularly in the agricultural sector, Firm YACONTO SE agreed to the suggestion of officials to participate in the creation and organization of mass production of **Biomass Power Generating Units (BEU - biomass energy units) in Russia to address environmental, energy, agro-chemical and socio-economic problems in the agriculture of the country.** BEU were to be deployed to agricultural enterprises to speed up processing of livestock and poultry waste into an environmentally friendly fertilizer and biogas, using the latter as a source of energy and heat. Leading experts and designers from SALYUT Design Bureau of Khrunichev State Research and Production Space Center (Moscow) and scientists from Institute of Biochemistry named after A.N. Bach of the Russian Academy of Sciences (Moscow) were involved in the research and development of BEU. By early 1993, a modern high-tech product based on high-end science and advanced technology was created.

The production technology of BEU was designed in a way that rocket bodies of ballistic missiles intended for disposal or destruction at the reduction of armaments under national disarmament program **could be used as reservoirs.** This could have become a good example of quality disarmament by bilateral agreement between the USSR and U.S. At the same time, Russian missiles would not be “destroyed”, but rather “broken down into components” like it’s done in the U.S. Then the funds provided to Russia by the West for the economic conversion of defense industries, with the mass production of BEU, would be used for their intended purpose, ensuring the effective development of industry, agriculture and the economy of the country as a whole. But the “ruling elite” used these funds to establish a class of “monopoly business partners” in Russia, including them in the “privileged caste” and a “group of oligarchs”. Through suspicious privatization and mortgage auctions they took over state (public) property. The YACONTO enterprises never participated in carving up of the state property, but purchased it legally for money earned in business.

BEU were planned to be produced on SOE IA (later OJSC) Atom mash, because in 1993 - 1994 all design documentation was fully adapted to this unique multi-profile enterprise, which possessed necessary high-tech equipment. Research and development of BEU (economic conversion goods) and its adaptation to SOE IA (later OJSC) “Atom mash” has been fully financed by Russian

YACONTO companies without the State's involvement. **On 20.03.1996 Rospatent granted to Firm YACONTO LLP a Patent № 2056393 for an invention of BEU, (Priority of invention since 19.03.1993).**

Despite the urgent need in BEU for large-scale development of national agriculture and despite the appeal from Atom mash OJSC to the Russian Ministry of Agriculture (out. № 18-5-PYAA from 18.05.1995) asking for assistance in deployment and adoption of the already created and tailored device, this agency declined to support the production of BEU on Atom mash by sending a rather cynical and evasive reply (out. № 5-18/267 from 05.06.1995). This led to the disruption of a very promising industrial program for the production of BEU on Atom mash OJSC for the successful development of country's farms. Thus the Russian Ministry of Agriculture caused great damage to the socio-economic development of agriculture and industry in Russia, as well as its food and economic security, as evidenced by today's realities.

The YACONTO enterprises demanded to return DD for the BEU and the "YACONTO DK-1" woodcarving machine during and after the bankruptcy of Atom mash OJSC, but these demands have not been met so far. The Statement of YACONTO enterprises (out № 14-8-KFYA from 14.08.2000) to the IA (police) and the Prosecutor's office of Volgodonsk city (Rostov region) regarding the inspection of the facts of illegal seizure of scientific and technical production and institution of criminal proceedings against the offenders, also brought no results. Today nobody can guarantee that intellectual property for said items is not used by third parties for commercial purposes, dealing economical and moral damage to YACONTO LLC.

Hence, as a Citizen of Russian Federation and a Proprietor of YACONTO LLC, I do not consider myself protected by the Rights declared in the Constitution of Russian Federation. Therefore, in order to fight lawlessness in Russia and to restore my rights as a Citizen of RF I need to employ powers enjoyed by international organizations, including international courts and tribunals, which are independent from the influence of Russia's ruling elite and its supporters. This is the basis for the International law enforcement system to conduct an independent, objective and meticulous investigation of premeditated bankruptcy and liquidation of the flagship of Russian nuclear engineering Atom mash OJSC and defense enterprise Salut JSC with the subsequent return of the said companies to the rightful owners, and a simultaneous investigation of the criminal activities of Russian corrupt officials.

Without a doubt, the result of an international investigation would be the imposition of a fair decision in favor of the victims, first and foremost of which - myself as a Russian Citizen and the Proprietor of YACONTO LLC and Russia itself as a State. Property belonging to the defendants, including assets in Russia and on the territories of other states of the International community, can serve as a compensation for enormous material damage dealt to the injured party. All of the

above in this appeal confirms that I intend to continue to vigorously defend my violated rights as a Citizen of the Russian Federation and demand the most severe punishment for hypocritical and irresponsible corrupt criminals in Russia, bearing above-the-law powers, and their accomplices.

To solve the problem of returning the property, expropriated illegally from the State and other shareholders during the deliberate bankruptcy of Atom mash OJSC that took place in 1995 - 1999, YACONTO LLC developed the Project-A, implementation of which will provide a successful solution of problems and challenges faced by Russia in the interests of the state, society and business. Implementation of Project-A will restore the status quo of Atom mash OJSC and bring back 30% of its shares to the State; the guilty party will compensate for the damage dealt; the State will accumulate the controlling stake in Atom mash OJSC through exchanging 28.5% shares owned by YACONTO LLC for property agreed with the investors and partners; all payables to third parties will be paid; the State accumulated interest in Atom mash OJSC and other assets may be transferred to entities authorized by the state to carry out the development of nuclear engineering and implementation of socio-economical development in Russia and abroad.

On the basis of the Presidential Decree of Russian Federation from 28.03.2011 № 352 **I ask you to take a decision** to restore the status-quo of Atom mash OJSC on terms of the implementation of Project-A which allows protecting rights and legitimate interests of its shareholders, of which the main one was the State itself. Based on the above, **I also ask you to reassign** the conduction of the independent investigation of the Atom mash OJSC bankruptcy case to the the Investigative Committee of the Russian Federation and restore the law.

Attachment: documents on 83 sheets.

(The Russian text of this letter is an original.)

Respectfully yours,

President of YACONTO LLC

S.P. YAKUNIN
