

DAVID DEVEDLAKA**Re.: No.110906-A01, September 06, 2011****Your Re.: letter dated August 30, 2011****Dear David,**

Thank you for letter dated August 30, 2011 and reference to Web site, which I examined with a great interest.

As mentioned in my letter dated August 19, 2011 President Medvedev issued 4 (four) orders according to which law enforcement offices are verifying bankruptcy details of the biggest atomic energy machinery plant in the world - Atommash OJSC. 30% of its shares belonged to Russian Government, Concern YACONTO CJSC owned 28.5% of that enterprise. As a result of intentional bankruptcy Government and Concern YACONTO CJSC were illegally deprived of their property.

YACONTO LLC is full and the only legal successor of Concern YACONTO CJSC. Thus the primary task of YACONTO LLC is to restore status quo in Atommash OJSC and to preserve legal rights and interests, which were violated by corrupted officials and kept in silence in Russia for more than a decade. Only when President Medvedev took control over the situation with intentional bankruptcy of Atommash OJSC, its shareholders obtained a real chance to get back their legal rights and interests.

In the interests of Government, society and business YACONTO LLC designed Project-A to restore status quo in Atommash OJSC. The plot of the Project was described in my letter dated August 19, 2011. I would like to clarify one principal moment. In course of rehabilitation of Atommash OJSC according to Project-A YACONTO LLC will have a right to attract foreign investors and partners to choose state-owned property in account clearance between Government and YACONTO LLC. These properties could be used in prospective joint projects and programs. It will let YACONTO LLC and its partners deploy business in global scale and attract all interested parties from different continents on long-time and mutually beneficial terms.

For your information in 1976 - 1981 USSR had spent for Atommash erection and all appropriate infrastructure around 17.8 billion US Dollars. During 30 years USD value decreased 6.9 times in comparison with January 01, 2010. So the current value of Atommash OJSC assets is 122.8 billion US Dollars without additional state investments for its development.

Hi-ranking officials who participated in intentional bankruptcy and liquidation of Atommash OJSC understand what will be the fate of those whose fault in this state-scale crime is proved.

According to President Medvedev's orders General Prosecutor Office and Ministry of Interior are verifying the details of bankruptcy and liquidation of Atomash OJSC. Meanwhile some officials who participated in Atomash bankruptcy oppose their efforts. They actively create obstacles for investigation, using circle support from bureaucrats. These activities undermine Mr. Medvedev's credibility before the state, society and business.

If Project-A to restore status quo in Atomash OJSC is successful, YACONTO LLC, its investors and partners will have a real possibility to attract different enterprises from Russian economy into YACONTO International Program. Implementation of this Program is aimed at fast development of all participating companies and states. Public awareness on projects and participants of YACONTO International Program is preliminary on some objective reasons.

If status quo restoration process in Atomash is undermined, YACONTO LLC will have to correct YACONTO International Program and to minimize Russian economy presence in projects and programs in Asia, Africa, Europe, South and North America, Middle East, as well as in former USSR republics. In this case YACONTO International Program will provide its participants with independence from Russian monopolist's pressure on exporters, transit states and consumers of hydrocarbons.

To solve the issue of status quo in Atomash effectively in the interests of potential investors and strategic partners YACONTO LLC and Russia itself need support from the heads of leading states before President Medvedev. It will help to change situation with independent investigation of Atomash bankruptcy and liquidation to better. And I don't have doubts that if Project-A scheme is supported there will be positive results in interests of states and companies involved in YACONTO International Program.

Confidential consultations on mutual interests with business elite, political and religious authorities of leading countries will help to design road map to implement YACONTO International Program and rule-of-law towards YACONTO LLC.

Some part of information about YACONTO LLS activities is published on my Web site www.yaconto.ru.

Dear David, I look forward to your and your partners answer to this letter.

(The Russian text of this letter is an original.)

Regards,

Sergei Yakunin

President of YACONTO LLC
