Your appeal to the President of Russian Federation, submitted at the Reception Desk of the President of Russian Federation for reception of citizens, has been reviewed.

The Control Directorate of the President of Russian Federation has requested necessary information to review your appeal in an impartial and comprehensive way.

As per the information we received, the possibility to acquire the industrial complex of the former Atommas OJSC in favor of State Corporation for nuclear energy Rosatom has been considered. The Government of Russian Federation believes that an integration of this complex into the structure of State Corporation Rosatom will help the Corporation meet its strategic objectives.

In order to solve this task, SC Rosatom and Sberbank of Russia JSC have established a joint venture – “Power Engineering” Group JSC. This company will be acting as a buyer of the assets of the Energomash Group, including the Atommas industrial complex.

The Russian Ministry of the Interior has provided a report, which says that an additional inspection of the materials of the premeditated bankruptcy of Atommas OJSC, provided by the General Prosecutor’s Office of Russian Federation, resulted in a resolution not to institute criminal proceedings due to absence of crime. The procedural decision taken has not been cancelled by the prosecutors.

Consultant of the Department for
maintenance of activity of the
Reception Desk of the President
of RF for reception of citizens

T. Ovchinnikova
