Re № 1-10806

From 06.08.2001

21. august 2001r.

No K-1036

To the General Director
of the Department of Transport
and Communications of Krasnodar Territory
V.M. Evdokimenko

350014, Krasnodar, ul. Krasnaya, 35

Cc: President of **YACONTO LLC**
S.P. Yakunin

President of **YACONTO LLC** S.P. Yakunin addressed the institute with a request to provide data on potential freight turnover that can be expected from **YACONTO LLC**'s Program for the construction of a new Black Sea commercial port in Tuapse region of Krasnodar Territory to the Department of transport and communications of Krasnodar Territory.

According to the "Concept of development of Krasnodar Territory ports" developed by "Soyuzmorniiproekt" institute and approved by the Government of Krasnodar Territory, the freight turnover of Azov - Black Sea basin for year 2020 is estimated at 124.5 million tons. The examination of existing port facilities, under condition of their renovation and expansion, including the existing Tuapse commercial seaport, showed an untapped volume of 30.0 million tons of dry cargo. Construction of new port capacities is indispensable for the utilization of this volume.

Proposal made by **YACONTO LLC** for the construction of a new Black Sea commercial port in Tuapse region can cover this freight turnover volume. The institute currently possesses no additional information.

Chief Engineer

M.A. Trotsky
